

PERIDECT

Effective protection of your perimeter

Easy to install, integrate and manage

PROTECTS YOUR PERIMETER MORE EFFECTIVELY

- + Detects an intruder **directly on the boundary** of the protected area
- + Gains **sufficient time** for the security operator for an **effective reaction**
- + Suitable for **various types of fences**
- + Extremely **low maintenance costs**

INDUSTRIES AND APPLICATIONS

- + Industrial and commercial sites
- + Strategic and critical infrastructure
- + Power plants
- + Airports
- + Prisons
- + Military areas
- + Embassies
- + National borders

Sieza - Success Stories
Power plants in South Korea

Sieza Peridect protects objects of

During the 14-day test, all intrusion attempts were detected by the detector located on the fence. The detector is small, easy to install and the simple and quick replacement of data is the best performance from all tested solutions.

Sieza - Success Stories
Fuel depots in Poland

Sieza Peridect+ has complied redundancy requirement

PERIDECT+ protects several fuel depots in Poland. It is a redundancy of the whole system was a mandatory requirement that met the specifications. Ring coin controllers (master/slave) is used for systems back up in circuit.

Our installation partner appreciates the modular coin service the system, reliability in extreme climate, small thanks to its easy integration, Peridect+ is hooked up to a graphical superstructure SW that helps the operator to detect intruders directly on the boundary of the protected area.

Sieza - Success Stories
Data centres in Hungary

Sieza Peridect+ succeeded where competing systems failed

PERIDECT+ protects two data centres in Hungary. It is a perimeter protection of strategic importance. Sieza was asked to replace a dysfunctional competitive system that showed a huge amount of false alarms. During the technical inspection of the installation site we found that the fence consists of massive steel plates, which are often whipped by gusts of wind. It primarily caused all false alarms.

Ticking the Boxes

- Very low false alarm rate
- Easy maintenance
- PSIM SW integration
- Integration with microwave barriers on the detection line

Thanks to a unique algorithm comparing information from neighboring detectors, Peridect+ reduces false alarms caused by environmental conditions. Another requirement, the connection of microwave barriers to the detection line, was easily solved by the LUP- (U/I) module. Thanks to its easy integration, Peridect+ is hooked up to a PSIM SW that helps the operator to detect intruders directly on the boundary of the protected area.

Spec list	• 2x CUP+ • 2x GSP+/LAN	• 4x LCP+ • 1x LUP+	• 389x DSP+ • 1,6km of perimeter

Easy to install, integrate and manage

PERIDECT+ KEY DIFFERENTIATORS (BENEFITS)

+ **Extremely low nuisance alarm rate** (typically 1 alarm/1 km/1 month)

Thanks to „differential logic“ algorithms and the ability to set the sensitivity of each detector individually

+ **Successful detection rate** (higher than 95%)

Thanks to the ability to increase the sampling rate of the communication bus

+ **Ring or star topology** (branching is possible)

Irregular shape of the perimeter can be covered without making the installation unnecessarily expensive

+ **PSIM support**

Milestone, Geutebrueck, Bosch BMS, Apollo, Avigilon, C4, Axxonsoft

+ **Redundancy**

Ring connection with one control unit and two-line controllers (master/slave) can be used for system back up in case of detection line interruption or a short circuit

PERIDECT+ OTHER FEATURES

+ Modularity

Modular architecture allows easy modification and system extension in the future

+ Detection accuracy (typically 3m)

Addressable vibration sensors fitted at each fence panel support very high detection accuracy

+ Integration with 3rd party systems

Open API are available for 3rd party system integration

Possibility to connect third party systems using I/O modules:

- LIP+ directly on the detection line
- IOP+ (RS485) located near to CUP+ (max 1200m)
- IOP+ (LAN) located literally anywhere in the world

+ Antivandal solution

Stainless steel tube for cables increases protection against mechanical damage and EM interference

TECHNICAL FEATURES

- + Up to **500 addresses** per one LCP+ (up to 1,5 km of perimeter)
- + **Separators** securing the operation of the detection line (20 per LCP+)
 - Surge protection
 - Communication bus data protection
- + **Individual sensitivity set up** of each detector (sensor)
- + **LAN, RS485** connections directly build in the CUP+ control unit
- + **No moving parts** – higher reliability (MTBF ~ 10^6 h)
- + **IP cameras** support (http(s), ONVIF S, open API)
- + **Analogue cameras** support (Pelco P/D)
- + **Buried and fence detectors** at one detection line

PERIDECT+ VERSIONS

+ PERIDECT+ Standard

- > Supplied with detectors connected from manufacturer production
- > UV resistant two-wire cable for outdoor use

+ PERIDECT+ Antivandal

- > Cable protected by stainless steel tube
- > Protection against mechanical damage and electromagnetic interference

+ PERIDECT+ Hidden

- > Invisible detection system
- > Detectors installed inside posts

+ PERIDECT+ Underground

- > Invisible detection system
- > Detectors installed under the ground

PERIDECT+ IN HAZARDOUS ATMOSPHERES

+ II 3GD Ex e IIA T6

- + **Group II** (explosive gases for locations other than mines)
- + **Sub-group IIA** (explosive atmospheres containing propane or gases of an equivalent hazard)

+ Category 3 GD

+ **Zone 2 for gas** (A place in which an explosive atmosphere consisting of a mixture with air of dangerous substances in the form of gas, vapour or mist is not likely to occur in normal operation but, if it does occur, will persist for a short period only)

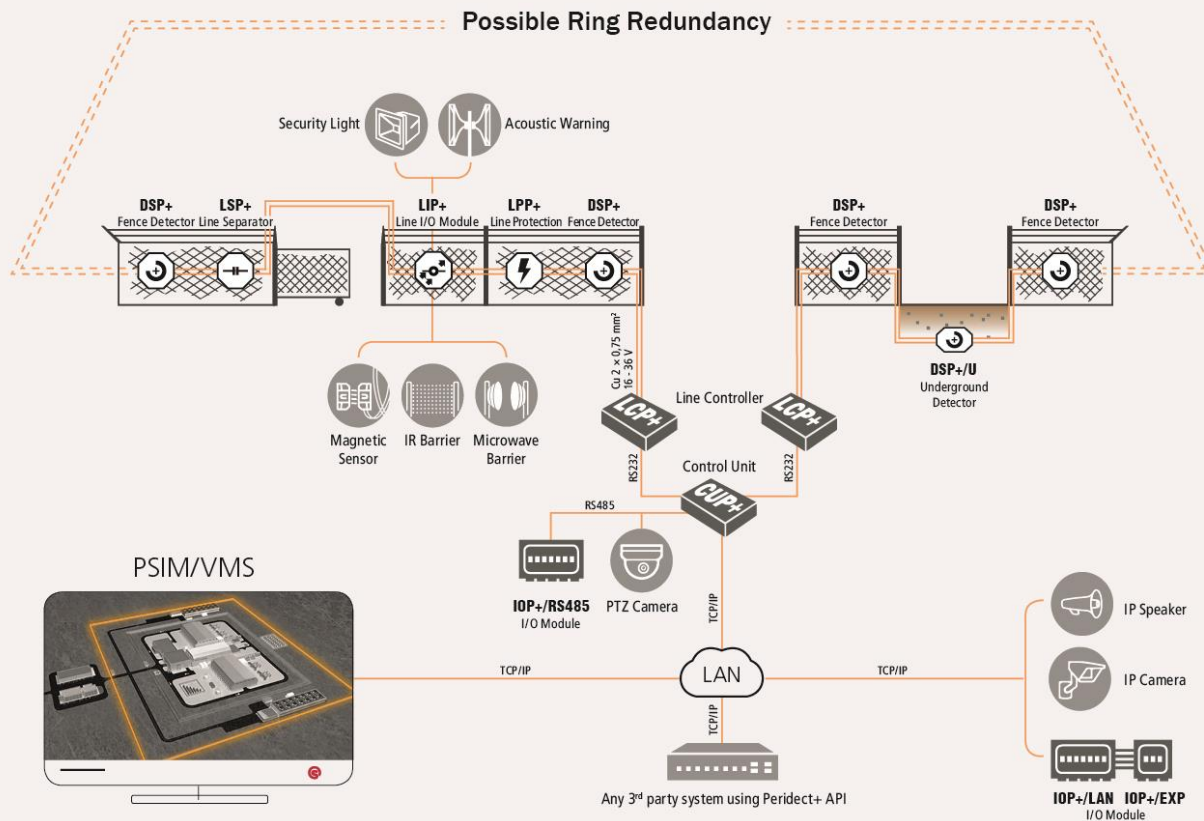

+ **Zone 22 for dust** (A place in which an explosive atmosphere in the form of a cloud of combustible dust in air is not likely to occur in normal operation but, if it does occur, will persist for a short period only)

+ **Protection type Ex e** (non-sparking devices)

+ **Temperature class T6** (maximum temperature of 85°C)

Easy to install, integrate and manage

Control Unit PERIDECT+ (CUP+)

- > Modular Industrial Computer
- > LAN - TCP/IP for connection to LAN/WAN
- > 4x directly controlled logical outputs
- > 1x tamper
- > 2x inputs for line modules (LCP+, PVJ)
- > RS485 communication bus integrated

- > Line module for communication with detection line
- > Galvanic isolation of detection line
- > Up to 500 detectors DSP+ or other modules
- > Immune 2-wire symmetric connection

Line Controller PERIDECT+ (LCP+)

I/O LAN Module PERIDECT+ (IOP+/LAN)

- > 16 relay outputs
- > Switching contacts
- > 2 double balanced inputs

I/O RS485 Module PERIDECT+ (IOP+/RS485)

- > 16 relay outputs
- > Switching contacts
- > 2 double balanced inputs

I/O Expansion Module PERIDECT+ (IOP+/EXP)

- > Expansion module for IOP+/LAN and IOP+/RS485
- > Switching contacts
- > Additional 16 relay outputs

Detection Sensor PERIDECT+ (DSP+)

- > Increased sensitivity
- > Remote setting of sensitivity
- > Software sensitivity set up

Line Separator PERIDECT+ (LSP+)

- > Limits short-circuit on the detection line
- > Maximum 20 separators per one line
- > Built-in overvoltage protection

Line Input PERIDECT+ (LIP+)

- > 2 double balanced inputs + 1 output
- > Fitting on any place on the line
- > Max. 64 per one CUP+ (128 inputs)

Line Protection PERIDECT+ (LPP+)

- > Overvoltage electronic protector

Plastic cover for all detection line components

- > UV resistant polycarbonate cover
- > Protection against unauthorized manipulation

Easy to install, integrate and manage

Eliminate number of false alarms and protect
your perimeter even more effectively!
