

Sieza Peridect+ helps reduce the number of burglaries

Our customer's mission is to minimize the impact of used IT equipment on the environment and change the way computers, phones and other technology are treated in society. For 25 years, they have been a global leader in IT product reuse. They had a high number of break-ins in their warehouse and therefore needed a solution to get early warning when intruders try to enter the premises. The two main requirements were integration with the existing CCTV and burglar alarm systems and redundancy support.

Ticking the Boxes

- **Reliable detection**
- **Integration with existing CCTV and burglar alarm**
- **Redundancy**

Sieza Peridect+ complied with all requirements. Peridect+ successfully eliminates nuisance alarms caused by weather. Redundancy (ring) connection with one control unit and two line controllers (master/slave) is used for system back up. With Onvif S support, IP cameras are automatically directed to the intrusion area, in case of an alarm. The customer gets an early indication of a burglar attempt, which buys time for guards and police to reach the site.

Spec list

- **1x CUP+**
- **1x IOP+**

- **2x LCP+**
- **3x LIP+**

- **81x DSP+**
- **250m of perimeter**
